1 Problem

Given 3 real numbers a, b, c, solve the equation:

$$ax^2 + bx + c = 0 \tag{1}$$

2 Solution

1. $a = 0$

   - $b = 0, c \neq 0 \Rightarrow$ there is no solution for equation (1).

2. $a \neq 0$. Let $\Delta = b^2 - 4ac$
3 Example
